

# CURRICULUM VITAE

## Damon Clark

BSc (Cartography)

GEOMATICS CONSULTANT

Perth, Western Australia

**Education**      BSc (Cartography), Curtin University, 1997

### **Professional Membership**

Damon Clark is a geomatics consultant working primarily in the geotechnical and civil design areas. Damon has 20 years' experience in the mining, civil, geotechnical and environmental areas, having worked for both mining companies and engineering/scientific consultants through his entire career.

Damon's main tools are AutoCAD (including Civil 3D) and ArcGIS. His experience lies in capture, storage, analysis and presentation of spatial information using a variety of systems. Additionally, he has modeled civil infrastructure such as dams, drains and runways using 3D Civil Design. Damon has a good understanding of the requirements to produce IFC drawings using CAD to meet client needs. He regularly liaises with other disciplines when required to achieve the desired outcomes.

Damon has been involved with various infrastructure projects including ports/harbours, residential and commercial developments, mine/rail infrastructure and oil/gas developments.
